Description

In top Condition, only test driven!

Cormate SU23-157. Brand new, only test driven for a few hours, and in top condition!

The Cormate Super Utility 23 is a simpel, yet versatile 23-footer with high quality, great finish and details that belongs in the premium class.

Even if the exterior is simple, the hull is highly advanced. Never before has the Cormate racing-gene been more obvious. Extremely low weight and revolutionary central-ventilated "monostep", results in an efficiency that has been impossible to achieve in a 23-foot day cruiser/walk around before. The aggressive delta-shape with a total om 24,5 degrees dead rise assures sporty seaworthiness and comfort far above the "normal" in this category of boats.
