Description

A fantastic opportunity to buy this well-kept 2011 boat.

This excellent example is Norwegian VAT-paid and is currently located in Rørvik, Norway.

The Fleming 55 is a well-proven raised-pilothouse motoryacht designed for serious long-range cruising. Her semi-displacement hull offers great flexibility in performance. The Fleming 55 has a range of 2,000 nautical miles at 8 knots.

Fleming's deep keel provides protection for the running gear and stability in following seas. Since noise and vibration contribute to fatigue, Fleming has paid special attention to creating a yacht that has become the industry standard for its whisper-quiet, smooth ride. Fundamental to this achievement is the use of Seatorque anti-vibration drive systems. Other builders either charge a significant premium for this or do not offer it at all.

The Fleming 55 was first introduced in 1986, and since that time it has benefited from a rigorous program of evolution. There have been literally hundreds of improvements made, both big and small. While its legendary hull design remains essentially the same, today's Fleming 55 is a thoroughly modern yacht utilizing advanced technology, materials and construction methods. In 2019 hull number 250 was launched, making it one of the most successful production yachts in history.
